

## Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

**Contrast** — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio. ▼

**Names and labels** — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Document doesn't have a `<title>` element ▼

**Internationalization and localization** — These are opportunities to improve the interpretation of your content by users in different locales.

▲ `<html>` element does not have a `[ lang ]` attribute ▼

**Additional items to manually check (11)** — These items address areas which an automated testing tool cannot cover. ▼

Learn more in our guide on [conducting an accessibility review](#).

**Passed audits (1)** ▼

**Not applicable (31)** ▼
